Skills

- Highly motivated and productive in group and independent environments
- Excellent critical thinker and creative problem solver
- Cooperative and engaging personality with great communication skills (written and verbal)
- Insatiable appetite for new challenges

Experience

Sagewell, Inc - Senior Front-End Software Engineer

Woburn, MA

April 2016 - Present

- Responsible for all front-end development across all products
- Lead and manage front-end engineers to efficiently meet and exceed requirements and deadlines
- Collaborate with backend engineers to develop new technologies based on requirements from business analysts
- By request of our largest client(10+ million customers), independently designed and developed a custom work order-tracking web app built on a MEAN stack as a SPA leveraging a serverless form building(Form.io) to be used during system downtime while client was transitioning to a new SAP system. Client's employees reported preferring the web app to the newly implemented system
- Technologies:
 - HTML/CSS/JS
 - AngularJS 1.X
 - Lucene
 - NodeJS
 - MongoDB
 - AWS
 - Docker
 - Git
 - Form.io
 - Bash
 - Linux
 - Windows

Simply Interactive Inc - Software Engineer

Seaport, Boston, MA

March 2014 – November 2015

- Maintained and improved in-house CMS, also contributed greatly to complete CMS overhaul
- Worked with a small engineering team (5 max) to meet tight deadlines to push production code for demanding clients including Walmart, Amazon, AT&T and Asurion
- Worked independently on large projects requiring full LAMP stack knowledge
- Redesigned multiple sites to be completely responsive and mobile-friendly
- Transformed an asset and project management spreadsheet into a fully-automated tracking, reporting and invoicing system through the use of Google's Apps Script, complete with efficiency tracking and a "high-score" scrolling marquee for employee motivation
- Technologies:
 - PHP
 - HTML/CSS/JS
 - Handlebars.js
 - Linux

- MySQL
- Git
- JIRA
- Windows

Cream, a creative assembly - Founder

Brighton, MA

April 2013 – December 2014

- Roles ranged from Test Engineer to Team Leader as I applied myself where needed to vet contractor-submitted code or develop features independently
- Managed dynamic groups of subcontractors working in collaboration to meet and surpass clients' expectations while maintaining budget and resource limitations
- Interacted, in person, with clients to clearly and accurately assess their specific needs, hopes and aspirations to our design and development team to minimize confusion and promote efficiency and transparency
- Technologies:
 - PHP
 - HTML/CSS/JS
 - Laravel
 - Blade
 - Linux
 - MySQL
 - Git
 - Windows

JE 3D – Freelance web design and development

Boston, MA / San José del Cabo, Mexico

August 2011 – April 2013

- Identified and pursued new clients through word-of-mouth marketing and local advertising
- Worked with high-profile clients such as Puerto Los Cabos(PLC) and Snell Real Estate
- Independently managed and executed the migration of an exterior site into the main PLC domain
- Technologies:
 - PHP
 - HTML/CSS/JS
 - Linux
 - MySQL
 - FTP
 - Adobe Dreamweaver
 - Git
 - MacOS

Education

Harvard University Extension School

Cambridge, MA

September 2015 – June 2016
