Experience

Simply Interactive Inc - Software Engineer
Seaport, Boston, MA

March 2014 – November 2016

- Maintained and improved in-house CMS, also contributed greatly to complete CMS overhaul
- Worked with a small engineering team (5 max) to meet tight deadlines to push production code for demanding clients such as Walmart, Amazon, AT&T and Asurion
- Worked independently on large projects requiring full LAMP stack knowledge
- Redesigned multiple sites to be completely responsive and mobile-friendly
- Transformed a static asset and project management spreadsheet into a fully-automated tracking, reporting and invoicing system, through the use of Google's Apps Script, complete with efficiency tracking and a "high-score" scrolling marquee for employee motivation

Cream, a creative assembly - Founder
Brighton, MA

April 2013 – December 2014

- Roles ranged from Test Engineer to Team Leader as I applied myself where needed to vet contractor-submitted code or develop features independently
- Managed dynamic groups of subcontractors working in collaboration to meet and surpass clients' expectations while maintaining budget and resource limitations
- Interacted, in person, with clients to clearly and accurately convey their specific needs, hopes and aspirations to our design and development team to minimize confusion and promote efficiency

JE 3D – Freelance web design and development
Boston, MA / San José del Cabo, Mexico

August 2011 – April 2013

- Identified and pursued new clients through word-of-mouth marketing and local advertising
- Worked with high-profile clients such as Puerto Los Cabos(PLC) and Snell Real Estate
- Independently managed and executed the migration of an exterior site into the main PLC domain

Skills

- Strong focus on organization
- Insatiable appetite for learning
- Unafraid of innovative and experimental solutions
- Motivated and efficient worker in group and independent environments
- Excellent critical thinker and problem solver
- Cooperative and engaging personality
